

**The City-wide Garage Sale
will be held Sat. JULY 11
all day. It's a great time to
round up those things
you'd like to get rid of—
Have a Garage Sale!**

Garage Sale/Bake Sale ads have
been posted in the Shopper, the
Tribune, online & FB.

**Hayward Lutheran
Church Bake Sale &
Quilt Raffle
8 - 11 a.m. - July 11th**

WE HAVE A NEW EMAIL ADDRESS

cityclerk@cityofhaywardmn.gov
the old one will no longer work

ATTENTION HAYWARD WATER USERS

The 2025 HAYWARD "Consumer Confidence Report for Drinking Water" will not be published or mailed to individual addresses.

A copy of this report is available at the locations below during their usual normal hours:

- The Hayward City Office
- Community Bulletin Board at the Post Office
- City website: Cityofhaywardmn.org

If you would like a copy of this report but are unable to stop in at any of the above-mentioned places, please contact Kathy Aase at (507) 373-1222 to arrange for a copy of this report mailed to you.

You can also search the Minnesota Department of Health website for copy of historic reports at <https://mnccr.web.health.state.mn.us/index.faces> or scan the QR code below using your phone.

The City of Hayward routinely monitors for the presence of drinking water contaminants. One such contaminant is gross alpha. The maximum allowable contaminant level is 15.4 pCi/L. Hayward's recent testing results were 39 pCi/L.

Gross alpha is colorless, tasteless, and odorless in drinking water and testing is the only way to identify its presence in drinking water. Drinking elevated levels of gross alpha can increase the risk of adverse health effects. If you have specific health concerns, speak with your doctor about it.

Gross alpha occurs naturally within ground water. Southeastern MN, in general, has higher amounts of gross alpha. **THIS IS NOT AN EMERGENCY.** You do not need an alternate source of water, such as bottled water. The MN Department of Health requires this information to be posted. There is a posting available on the bulletin board outside the post office.

Home water treatment units are available to reduce gross alpha, including water softening, reverse osmosis, and distillation.

Gross alpha occurs naturally within ground water. **HAPPY 4th OF JULY! A huge
"thank you" to all men & women
who selflessly serve to protect
our freedom and keep us safe -
our Military, Fire Depart., First
Responders, Police, & everyone
who works to protect US!**

**Please DO NOT blow grass
clippings on the street or in
the alley. When mowing,
blow the grass clippings
back to your yard.**
